

Practice Exercises

A. Refer to the figure on the right to answer the following.

1. Name the angles that intercept \widehat{AP} .

2. Name the angles that intercept \widehat{EV} .

3. Name the arc that is intercepted by $\angle PAE$.

4. Name the arc that is intercepted by $\angle EVP$.

5. If $m\angle PEA = 48$, then $m\widehat{AP} = \underline{\hspace{1cm}}$ and $m\angle AVP = \underline{\hspace{1cm}}$.

6. $m\angle EPA = \underline{\hspace{1cm}}$

7. $m\angle EVP + m\angle PVA = \underline{\hspace{1cm}}$

8. If $m\angle VEP = 100$, then $m\angle PAV = \underline{\hspace{1cm}}$.

B. Use the given figures to find the value of x and y .

C. Given $\odot S, \overline{AR} \cong \overline{RO} \cong \overline{OS} \cong \overline{SA}, m\angle AMR = 3x + 20$ and $m\angle OMR = x + 30$. Find each measure.

1. x
2. $m\angle AMR$
3. $m\angle ORM$
4. $m\widehat{AM}$
5. $m\angle RNO$
6. $m\angle RAM$
7. $m\widehat{AR}$
8. $m\widehat{OM}$
9. $m\angle ROM$
10. $m\angle AMO$

Problem Set

Use the given figures to answer the following.

A. $\triangle GOA$ is inscribed in $\odot L$. If $m\angle OGA = 75^\circ$ and $m\widehat{AG} = 160^\circ$, find:

1. $m\widehat{OA}$
2. $m\widehat{OG}$
3. $m\angle GOA$
4. $m\angle GAO$

B. In $\odot F$, \overline{AB} , \overline{BC} , \overline{CD} , \overline{BD} , and \overline{AC} are chords. Use the figure and the given information to answer the following questions.

1. If $m\angle CBD = 54^\circ$, what is $m\widehat{CD}$?
2. If $m\widehat{AB} = 96^\circ$, what is $m\angle ACB$?

3. If $m\angle ABD = 5x + 3$, and $m\angle DCA = 4x + 10$, find:

a. x

b. $m\angle ABD$

c. $m\angle DCA$

d. $m\widehat{AD}$

4. If $m\angle BDC = 6x - 4$,
and $m\widehat{BC} = 10x + 2$, find:

a. x

b. $m\angle BDC$

c. $m\widehat{BC}$

d. $m\angle BAC$
